## Notes about the MCD print templates

The following 3 templates are the **officially approved and standardized** MCD print templates for the German, French and Italian language branch, respectively.

To fit these templates into a PDF, the real templates were slightly reduced (approx. 7%). Click onto each green overlayed rectangle to see the meaning and possibly the translations of the selected field. The notes are the same for each language branch.

Please read the XSD documentation on the Forum Datenaustausch website ([www.forum-datenaustausch.ch](http://www.forum-datenaustausch.ch)) for an extended in depth description of that schema.

Notes about the typographie: the **Arial** font is used throughout the document except for the ESR coding lines. A font size of 7 is used for the title descriptor, whereas a font size of 9 is used for the content descriptors.

Type content. The sequence must be diagnosis, then procedure code/value pairs.  
Furthermore the very first diagnosis is per definition the main diagnosis. Whereas the main diagnosis must be given the remaining diagnoses and procedures are optional.
